DETAILED ACTION

1. Applicant's election without traverse of 1/10/07 is acknowledged.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With regard to claim(s) 1 & 9, the preamble is not commensurate with the body of the claim(s). The examiner suggests linking "multi-modal" to some of the feature(s) in the body, even if only as intended use language. For both claim(s) and by way of example, claim(s) 1, line(s) 10 & 12, the manifolds should be connected to each container. If these are different inlets/outlets than already recited in the claim(s), this isn't fully clear by the language. For both claim(s) and by way of example, claim(s) 1, line(s) 5, "can be loaded ...by entrainment"; this language recites a mere possibility and is therefore not afforded patentable weight. This is not the case in line(s) 7 as a container outlet must have some structure to be able to perform this function. The examiner suggests something like --is loaded by entrainment. . .during loading mode--.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3651

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-8 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Feldsted (4,525,107).

Feldsted (4,525,107) either disclose(s) or suggests the recited limitation(s), particularly in view of the 112 second rejections above.

It would have been obvious to modify Feldsted (4,525,107) to provide/substitute in order to increase system versatility or accommodate practical considerations.

Conclusion

7. Claim 9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

8. Claims 10-11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
